Abstract: Abstract should be between 150–200 words and should state briefly the purpose of the research, the principal results and major conclusions. An abstract is often presented separately from the article, so it must be able to stand alone. For this reason, references should be avoided, but if essential, then cite the author(s) and year(s). Also, non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself.

1. Introduction

You can use the following cite commands:

Single reference with number only: [1]

Multiple references with number only: [2–4]

Single reference with two or fewer authors: Affleck and Fish [2]

Single reference with three or more authors: Wang et al. [5]

Two references with authors: Kee et al. [6] and Baumgardner et al. [7]

Three or more references with authors: Kee et al. [6], Baumgardner et al. [7], and Haworth and Pope [8]

2. Methods/Experimental
